D&B D-U-N-S Registered™ Profile

About the company

PRINTEC offers full in-house engineering and design services, supported by experienced project engineers with the latest CAD/CAE technology and pre-press software/hardware. PRINTEC manufacturing capabilities are extensive. Press room capabilities include screen printing and IR lines with the ability to process a variety of conductive inks as well as conventional solvent and UV decorative ink systems. Computerized Color matching is utilized to insure Color consistency and reputability. Our products are used extensively in commercial, industrial, and high-tech applications, notably for computers, robotics, communications and medical equipment.
